

## Junior Simba Machine - Standard Version

Junior Simba Machine, Ring Drilling Equipment is designed specially for underground mines and Tunnel to drill in 360° rotation for conventional drilling, at any angle for small mines of 3 Meter radius. The same is easy to dismantle & easy to move from one place to another. Suitable application for drilling, tunneling, drifting & long hole drilling

### Technical Details

<b>Pneumatic drifter</b>	VK – 12
<b>Hole Diameter</b>	51-64 mm
<b>Drill Steel Rod &amp; Length</b>	Size - R32, R38, T38, Length - 1.20 Mtr
<b>Drilling Length</b>	Maximum Drilling Length 25 Mtr
<b>Air consumption</b>	400 CFM @ 7 Kg/cm <sup>2</sup>
<b>Drilling Rate</b>	4 Minute per Meter
<b>Feed Beam</b>	Screw Feed Type BMS-46
<b>Rod Catcher</b>	Pneumatic Type BSP-10
<b>Dimension in mm</b>	(L x W x H)
- closed column Bar	1780 x 1550 x 2600
- open column Bar	1780 x 1550 x 3300
<b>Net Weight - Standard Version</b>	1200 Kgs
- Lateral Movement Version	1500 Kgs

### Optional - Lateral Movement Version - Specially Designed for Parallel Hole Drilling
