

Mucking Machine

Mucking Loader is an auto-loader with which the operator can manage loading, haulage and dumping. It is constructed for work in hard, abrasive rock and is suitable for operations in both narrow drifts and large rock chambers. Rubber tyred wheels with four-wheel drive allow smooth driving and a sure advance. Hoses can be driven over without being damaged. The steering is stepless.

Technical Details

Weight	3150 Kg
Body capacity	1 m ³
Bucket Capacity	0.13 m ³
Net loading capacity	0.7 m ³ /min
travel speed	1 - 1.4 m/s
