

Pneumatic Drifter

The Drifter is a heavy duty Rock Drills used for drifting and tunneling and for benching and production drilling, with 32 mm (1 1/4") and 38 mm (1 1/2") extension drill steel equipment, respectively. The machines can be used in both underground and surface work mounted on Wagon Drill, with feature of reversible rotation, which can be also be disengaged, so that only the impact mechanism works. Flushing is possible as air blowing or water flushing, and all drill functions are operated from a control unit.

Technical Details

Model	VK-12
Weight	69 Kgs (152 lb)
Overall Length	780 mm (30 3/4")
Air Consumption	354 cfm (167 l/s)
Working Pressure Max.	6 bar
Impact Rate	33 Hz
Impact Power Max.	7.2 kw
Rotation Speed	0 – 180 rpm
Piston Diameter	120 mm (4 3/4")
Piston Stroke	65 mm
Hole Diameters	48 – 89 mm
Drill Steel/Shank Adapter Type	R32, R38, T38
